Election Campaign Management App

Candidate Election Operations – Blueprint

Scope: campaign period se lekar Polling Day tak. Post-election CRM scope mein nahi hai.

1. Objective

Candidate aur campaign team ke liye ek single platform: voter-roll administration, booth management, team coordination, field tasks, public/civic issue reporting, campaign calendar, expenses, compliance aur election-day operational reporting.

2. User Roles

Role	Access
Super Admin	Campaign setup, candidate accounts, system management
Candidate / Campaign Manager	Dashboard, booths, team, tasks, reports, expenses
Ward / Area Coordinator	Assigned areas, workers, tasks, reports
Booth Coordinator	Assigned booth, workers, tasks, reports
Field Worker	Assigned tasks and field reports

3. Candidate Dashboard

Booths, wards/areas, active workers, completed/pending tasks, meetings, reported issues, recorded expenses and compliance status.

4. Voter Roll + Booth Management

Excel/CSV import, column validation, duplicate/error checking, booth/area filtering and authorized search. Structure: Constituency → Ward → Area → Booth → Voter Roll. Individual political preference/support must not be stored or inferred.

5. Booth & Team Management

Assign coordinators and workers; maintain roles, assigned booth/area, contact and work status.

6. Field Task Management

Create task → assign worker → deadline → status → report. Statuses: Pending, In Progress, Completed, Issue.

7. Public/Civic Issue Collection

Record legitimate public issues such as road, water, electricity, drainage, street-light and sanitation issues with area, description, photo where appropriate and status.

8. Campaign Calendar

Candidate meetings, booth meetings, worker training, public events, campaign activities and important election deadlines with reminders.

9. Campaign Content Manager

Central library for approved posters, announcements, press-note drafts and social-media copy. AI may assist drafting/translation with human review.

10. Campaign Expense Tracker

Date, category, amount, description, bill/receipt and approval status. Statutory rules/limits should be verified for the specific election.

11. Compliance Center

Checklist for permissions, events, advertising/materials, expense documentation and election-day restrictions. Status: Done, Pending, Attention Required.

12. Daily Campaign Report

Automatic summary of active workers, completed/pending tasks, booth reports, issues, events and recorded expenses. PDF/notification-ready.

13. Election-Day Command Center

Polling-day operational dashboard for booth/team status, operational issues and escalations. Do not track how an individual voted or infer vote choice.

14. Security & Access

OTP/MFA, role-based access, encryption, audit logs, backups, export controls and retention/deletion policies. Workers receive only required data.

15. Main App Screens

No.	Screen	Purpose
1	Login	Secure authentication
2	Candidate Dashboard	Overall campaign status
3	Voter Roll	Authorized voter-roll administration
4	Booth Management	Booth/polling-station/team information
5	Team Management	Coordinator/worker assignment
6	Tasks	Create, assign and track field work
7	Public Issues	Civic issue reporting
8	Campaign Calendar	Events and deadlines
9	Expenses & Compliance	Expense records and checklist
10	Election-Day Command Center	Polling-day operational status
11	Admin Panel	Users, permissions and reports

16. MVP – First Development Version

- Candidate login + roles
- Dashboard
- Excel/CSV voter-roll import
- Constituency → Ward → Area → Booth structure
- Booth management
- Team/worker management
- Task assignment and reports
- Public/civic issue reporting
- Campaign calendar
- Basic election-day command center
- Role-based security + audit log

17. Suggested Technology

Mobile: Flutter | Web Admin: React/Next.js | Backend: Node.js/NestJS or Python Django/FastAPI | Database: PostgreSQL | Maps: Google Maps/Mapbox | Hosting: AWS/Azure/Google Cloud

18. Basic Database Tables

users, candidates, campaigns, constituencies, wards, areas, booths, polling_stations, voter_records, workers, worker_assignments, tasks, task_reports, events, documents, expenses, notifications, audit_logs

19. Product Flow

Candidate → Campaign Setup → Constituency → Booths → Team Assignment → Field Tasks → Reports → Calendar/Expenses/Compliance → Election-Day Command Center → Final Election Report

20. Product Boundary

This product is for election-period operational management. It should not provide individual voter political-preference profiling, vote-choice prediction, or targeting based on inferred political views. Applicable election laws, ECI directions, privacy requirements and platform rules should be reviewed before deployment.
